

## PRODUCT USE GUIDE FOR NOVA LONG-LIFE GLOSS FINISH BN001

### Product Description

Our flagship solids-rich metallised emulsion dressing. Can be easily maintained with or without a machine. An ideal base for spray buffing and mop and buff.

### Product Features

- **Better Shine** - Dries to a high gloss without machine buffing. Greater flexibility resists powdering and permits the use of spray cleaning, mopping and buffing systems.
- **Longer Lasting** - Skillful formulation backed by many decades of experience has combined top quality ingredients for toughness and maximum durability. The high shine remains clearer and brighter - even in heavy traffic areas, wet or dry.
- **Easier to Use** - Combines base/primer coat and top dressing in one product. Just two coats are adequate for most floors. Dirt and heel-marks can be removed merely by wiping away.
- **Greater Protection** - The tough, hard-wearing film shields your floors against dirt, heel-marks, water and wear. Excellent underfoot safety is an additional 'plus'.
- **More Economical** - The high solids-content means less applications. The shine stays cleaner and lasts longer. Marks and dirt can be removed more easily. With or without a floor machine, maintenance is simplified. Another important feature is 'built-in' removability - for economical stripping at a later date. All these points add together to show a real reduction in total maintenance costs.
- For use on rubber, linoleum, vinyl, vinyl asbestos, thermoplastic, asphalt, sealed wood and sealed cork floors, etc.
- For a brilliant, long-lasting shine, Nova Long-Life Gloss is rich in high quality solid ingredients. Even old, porous floors can now be restored to a forgotten brilliance. It produces a supreme, long-lasting shine - quickly and easily.
- DO NOT APPLY MORE THAN 6 COATS IN TOTAL BEFORE STRIPPING USING NOVA STARBRITE.

### Direction for Use

- Clean floor thoroughly with Nova Liquid 99. (Strip old polishes with Nova Starbrite Emulsion Dressing Remover). Neutralise the floor with vinegar solution (See Nova Starbrite instructions) Apply two thin coats of the product with a clean mop or applicator (**DO NOT USE SHEEPSKIN**). A third coat may be required on old or porous floors. Allow at least 30 minutes between coats and overnight for final coat.
- Either a) "Spray clean" dirty areas. Use Novacare Floor Maintainer or if antibacterial action is required use Nova Lime-Lite Antibacterial Maintainer. Machine area clean and dry, all in one operation. Or b) Damp wipe dirty areas. Novacare Floor Maintainer is particularly recommended. Burnish when dry if desired. ("Mopping and Buffing" method).
- Will cover 50 square metres per litre per coat.

Note only the British Nova products detailed above are safe to use with Long-Life. Other products are used at the user's risk.
